EDUCATION

Bachelor of Engineering – Artificial Intelligence & Machine Learning	2023-2027
Global Academy of Technology, Bangalore	CGPA: 9.48/10.0
Pre-University (12th) – SGPTA PU College	2023 95.17%
SSLC (10th) – SSVM	2021 92.64%

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C++, SQL

AI/ML Frameworks & Libraries: Natural Language Processing Libraries, TensorFlow, Keras, Pandas, Scikit-learn, PyTorch, LangChain, LangGraph

LLM & Agentic AI: Large Language Models, RAG (Retrieval-Augmented Generation), Model Fine-Tuning, MCP (Model Context Protocol)

Cloud, Deployment & Tools: Git, GitHub, Docker, AWS, Railway, Digital Ocean, Render, Vercel, API Integration

PROFESSIONAL EXPERIENCE

IEEE Computer Society-IAMPro 2025	April 2025 – September 2025
AI/ML Intern — AI Hotel Receptionist	Link: GitHub Repository

- Built a voice Bot to mimic the work of a hotel receptionist.
- Used LangChain for agent orchestration, Speech-To-Text (Deepgram) and Text-To-Speech (Eleven Labs) models for the voice-based interaction.
- Hardest part – no open-source hotel management services available, had to build one in MongoDB and connect the agent.
- Achieved sub 5ms latency for general queries and sub 15s for entire operation workflows (bookings, cancellations).
- **Technologies:** Speech-To-Text models, Text-To-Speech models, LangChain, MongoDB, FastAPI, HTML, CSS, JavaScript.

PROJECTS

Mini-Meta Agent for Math Problem Solving & Multi-Agent Debate Systems	2025
--	-------------

- Developed a Meta-Agent Framework architecture that orchestrates four different LLM providers/APIs (Groq, OpenAI, Cohere, and Hugging Face) for solving complex mathematical word problems.
- Implemented Retrieval-Augmented Generation (RAG) pipeline using vector embeddings and semantic similarity search to provide context-aware problem-solving support.
- Implemented a Multi-Agent Debate System with Solver, Retriever, and Judge agents that collaboratively generate, evaluate, and rank solutions through structured reasoning.
- Designed Flask REST APIs for agent communication, debate execution, and performance monitoring, improving solution reliability and scalability.

AI-HireSphere	2025 – 2026
----------------------	--------------------

- Developed HireSphere AI, an AI-powered Resume Intelligence Platform using FastAPI, React, Supabase, and Gemini LLM for automated candidate evaluation.
- Built an NLP pipeline for PDF resume parsing, skill extraction, text processing, and structured candidate profile generation.
- Implemented TF-IDF and cosine similarity-based resume-job matching with role recommendation and skill gap analysis.
- Integrated Gemini LLM-based insights, AI HR assistance, REST APIs, and database for scalable resume analysis.

Doc2Learn-AI: AI-Powered PDF-to-Course Generation Platform	2026
---	-------------

- Developed an AI-powered platform using Next.js, FastAPI, PostgreSQL (Supabase), and Groq LLMs to convert PDF documents into structured learning courses.
- Implemented an NLP and Retrieval-Augmented Generation (RAG) pipeline with OCR, semantic chunking, and vector embeddings for context-aware course generation.
- Built AI-driven quiz generation, semantic search, and secure REST APIs with asynchronous backend processing for scalable document analysis.
- Integrated Supabase Authentication, PostgreSQL, and object storage to enable secure document management and personalized learning workflows.

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle
- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** – Oracle
- **Introduction to Large Language Models** – IBM
- **The Joy of Computing Using Python** – NPTEL
- **Mastering the Art of Prompting** – IBM
- **Getting Started with Machine Learning Algorithms** – Professional ML Certification
- **Introduction to Artificial Intelligence** – Infosys Springboard
